January 23, 2022

1 HOW TO USE THE PROGRAM

1.1 Prerequisites

- You must have any python compiler installed preferably pycharm with xlrd==1.2.0 installed.
- You must enable less secure app access in your google account(Click here).

1.2 How to go about the project

- Copy a resume.pdf in the same directory as our Code.py.
- Add all emails into the Recruiters.xlsx.
- Now compile the code using the python compiler.
- In the GUI that appears you are required to add the email and password of the sender.

NOTE: You can change the body and subject in the Code.py
